Subject: Red 3 and Colour Additive Removal for Ensure®, Glucerna® and PediaSure® Products

Dear Valued Customer,

We are writing to inform you of updates to select Abbott Nutrition products as we continue our commitment to meeting evolving consumer preferences.

We are removing colour additives[†], including Red 3 (erythrosine), from all strawberry and mixed berry nutritional drinks and select chocolate nutritional drinks, where present, including Ensure®, Glucerna® and PediaSure® sold in Canada. With this, the differences are as follows

- Strawberry and mixed berry nutritional drinks will be off-white in colour.
- No colour change for chocolate nutritional drinks.

While these products will have a new look, they will continue to deliver the same great taste and nutritional benefits.

Ingredient lists of updated products will reflect the removal of colour additives[†] and related packaging visuals will be adjusted to enhance flavour cues. Please note, product list numbers and pricing are unchanged. A [list of updated products](#) and [ingredients](#) as well as a [packaging change reference chart](#) are included on the following pages.

Timing

The updated formulations and packaging will begin shipping in Q3 2026[†]. Please note, both current and new formulations may be available during the transition period.

As always, your ongoing support and loyalty are important to us, and our team is here to help. Should you need any support during the transition or have questions, please contact your Abbott sales representative.

Sincerely,

Gina Munafo

‡ Estimated availability is based on current product demand.

Packaging Change Reference Chart – This chart summarizes most packaging updates, including bottle/can sleeves and carton boxes, for products removing colour additives†; packaging graphics may vary slightly between products.

Flavour	Formulations with colour additives† (Current)	Formulations without colour additives† (New)
Strawberry		 - Strawberry garnish added in the glass for flavour cue. - Liquid in glass changed to off-white to match the liquid colour without colour additives†. “No artificial colours” callout added to emphasize that colour change is occurring due to the removal of colour additives. - Pink background added behind flavour name to preserve visual association with the flavour.
Mixed Berry		 - Mixed berry garnish added in the glass for flavour cue. - Liquid in glass changed to off-white to match the liquid colour without colour additives†. “No artificial colours” callout added to emphasize that colour change is occurring due to the removal of colour additives. - Purple background added behind flavour name to preserve visual association with the flavour.
Chocolate		 - Chocolate garnish added in the glass for flavour cue. - Brown background added behind flavour name to preserve visual association with the flavour.

† In addition to Red 3 (Erythrosine), the colour additives Blue 1 (Brilliant Blue FCF) and/or Annatto and/or Sunset Yellow FCF and/or Allura Red are also being removed from select products, where present.

‡ Estimated availability is based on current product demand.
